PROFILE

Software Developer with experience in backend payment systems, API integrations and technical workflow automation. I work with Go and Java, automated testing and production troubleshooting. I combine AI-assisted development with code review and validation of results.

PROFESSIONAL EXPERIENCE

Software Developer | Mercado Libre

July 2022 - Present · Remote, Argentina

- Develop and maintain Go and Java backend services for payment systems and integrations between services.
- Investigate inconsistencies and errors using SQL queries, BigQuery, audit trails, logs and metrics.
- Implement and review unit and integration tests; maintain mocks and testing environments.
- Instrument and analyze Datadog metrics to review errors, latency and service behavior during releases.
- Automate technical tasks and reporting with AI assistants and MCP integrations.

Programming Tutor | Coderhouse

February 2022 - December 2023 · Part-time

Reviewed programming assignments, answered technical questions and prepared supplementary sessions in coordination with instructors and fellow tutors.

Full-stack Developer | Machi

October 2021 - November 2021 · Internship

Contributed to the frontend and backend of an agricultural products e-commerce application.

TECHNICAL SKILLS

Backend: Go, Java, Spring Boot, REST APIs. **Web development:** JavaScript, TypeScript, Node.js, Express, React.
Data and quality: SQL, NoSQL, BigQuery, unit and integration testing, Postman, Maven.
Tools: Git, GitHub, Jira, Datadog, Grafana, MCP, AI-assisted development. **Personal projects:** Python, SQLite, Electron.

PERSONAL PROJECTS

LoL Personal Stats Tracker: dashboard with a Python backend, Riot Games API integration, SQLite caching and API rate limit handling.

FitApp: JavaScript and Electron application for workouts, nutrition and pantry management; local persistence and data import/export.

EDUCATION AND TRAINING

Technical program in Programming · Universidad Tecnológica Nacional · Started 2020, in progress.

Full Stack Web Developer · Henry · 2021. **Backend Java** · Mercado Libre / Digital House · 2022.

Courses: Python (Udemy, 2024); design patterns and SOLID; Datadog monitoring (Udemy, 2023).

LANGUAGES

Native Spanish. English: written and spoken communication; proficiency not formally certified.
